

# NETWORK

Performance, scale and intelligence for modern enterprise networks

Affinity's Network Consultants deliver intelligent network infrastructure that allows companies regardless of size, to manage their IT investments and support their business objectives. Through our numerous alliances, including Palo Alto Networks, Aruba Networks, Fortinet, Cisco Systems and Tellabs, we are able to leverage emerging advances in optical, wireless, IP convergence, security and intelligent networking to deliver joint, best-of-breed solutions that can access key markets and technologies.

## NETWORK INTEGRATION & DEPLOYMENT

**Businesses embracing digital transformation won't go far with switches stuck in the past.**

A next-gen infrastructure built on cloud-native principles that delivers performance, automation and analytics is required to support newer technologies and future business needs.

Affinity's switching portfolio is purpose-built for cloud, mobile and IoT. Scalable access to data center platforms deliver the power and future-proofing needed for growing user, device and app demands. Intuitive management tools and built-in analytics cut IT complexity by reducing time spent on implementing changes and troubleshooting errors.

## MOBILITY & WIRELESS

**Enterprise Wi-Fi connectivity for optimized user and IoT experiences.**

As corporate applications move to the Internet and cloud, Aruba, Cisco & Fortinet wireless solutions deliver simple, fast, and secure access anywhere.

## TRANSMISSION & OPTICAL NETWORK

**Better scalability with greater connectivity .**

Leverage on Tellabs powerful triple-play service capability over fiber solution.
